Personal Profile

As a graduate with a 2:1 honour's degree in Applied Computing I am confident I can take on any position within an organisation's IT department as I have experience in computer programming, database management, information systems, networking and web development. I have excellent interpersonal skills and work well as part of a team.

A self-motivated and ambitious individual who is keen to add to my knowledge and experience to improve my career. I am constantly challenging and striving to improve my skills and competences, to make me an asset to any organisation that is looking for a younger generation with great IT vision.

Skills

- Reception/Customer Experience
- Collections enquires
- Web Design/Maintenance – WordPress, HTML, CSS, JavaScript, GIMP
- Technical Support – hardware and software, networking and database systems
- Microsoft office(365)
- Complaints management
- 7+ Years of inbound and outbound sales experience

Career Summary

May 2025 – Present

Arrears Executive

Target Group

- Managed inbound and outbound calls with mortgage customers in arrears, offering tailored support while maintaining regulatory compliance under FCA and MCOB guidelines.
- Conducted detailed affordability assessments to agree sustainable repayment arrangements and reduce delinquency risk.
- Handled a wide range of sensitive and complex enquiries, including vulnerability disclosures, probate cases, and litigation-preventative outreach.
- Delivered clear and empathetic communication to distressed customers, guiding them through payment options, arrears explanations, and consequences of non-payment.
- Accurately updated customer records, call notes, and payment arrangements in CRM systems to ensure full audit compliance.
- Adhered strictly to GDPR and data protection requirements, verifying caller identity and managing third-party authority protocols.
- Liaised with internal departments (litigation, complaints, and payments teams) to ensure timely resolutions and a positive customer experience.
- Promoted positive customer outcomes by referring customers to free debt advice services when appropriate.
- Consistently met or exceeded key performance targets including call quality, case resolution, and compliance audits.
- Operated fully remotely, using laptop-based telephony and CRM software to manage a high-volume case load efficiently.

February 2023 – April 2025

-

January 2022 – March 2022

Take Payments Ltd

Customer Loyalty Specialist

Managing and delegating B2B enquiries on both a customer service and administration level. Reviewing and negotiating transaction rates for payment terminals while promoting retail strategies for clients.

January 2021 – December 2021

Vodafone UK Limited

TSAR Advisor

In this sales based role, I am the main point of contact for our customers, ensuring they receive the best service possible every step of the way. Whether they are enquiring about broadband deals, a new SIM or even looking to leave us, I provide all the necessary information require to answer their enquiry.

November 2018 – November 2020

Sky UK Limited

Customer Priority Specialist

My current role as a Customer Priority Specialist involves the management and delegation of domestic and corporate complaint cases. These cases represent a short or long term complaint that needs to be dealt with promptly to provide a satisfactory solution for our customers.

This can include anything from domestic field installation disputes, billing and debt enquiry, customer relations experience, product advertisement disputes as well as corporate response cases. It is my departments responsibility to resolve any escalated service complaints before it is referred to the Ombudsman to give a final decision.

January 2017 – November 2018

Sky UK Limited

Customer Service Advisor

As a Customer Service Advisor I speak with a variety of customers who have an issues or question about their Sky service. These queries can range from anything between billing, sales transactions, technical assistance, product information, account management and much more.

As of the recent release of the Sky VIP loyalty scheme, I have also had the opportunity to work very closely with some of our most loyal

customers as a VIP advisor. Therefore this role entails putting the customer first as top priority here while providing a professional and friendly level of customer service. To specify, my role involves the following responsibilities:

- Explaining the break down of current and future bills.
 - Providing technical assistance regarding the Sky+, Sky+HD and Sky Q systems.
 - Processing customer sales requests or account upgrades for both Sky TV and broadband services.
 - Informing customers of the latests Sky products and services depending on eligibility(i.e. Sky VIP loyalty scheme).
 - Dealing with specific account management queries such as renewing contracts and incentives for both Sky TV and Broadband packages.
 - Complaint management.
-

March 2015 – November 2016

Casillas Consultancy Ltd

Web Content Developer

My position as Content Developer involved the editing and facilitation of company data and media. This would include creating landing pages, forwarding client requests, updating company policies and overall design and maintenance of the primary business website. This would be done using the content management system WordPress where I would be able to update specific parts of the website as requested for client use.

In addition to this I would also be given financial figures to organise into spread sheets to calculate the feasibility cost of each individual project that was issued by our clients. The process in which I would develop a webpage would involve either creating or editing an existing HTML/CSS file that would be uploaded to the host server's folder.

Once these changes has been implemented, I would use the theme feature within WordPress to import the page template onto the respective pages.

December 2014 – February 2015

The Co-operative Banking Group

Digital Content Advisor

This role involve a high degree of HTML editing and design as there would normally be a daily demand for changing company data. The process in which this would take place revolves around an internal emailing system exclusive to the Cooperative bank. When a specific change needed to be made, the client would email a request to one of the line managers with reference to the page and its content.

The task would then be handed to one of the three editor within my team who would utilise a local system which kept records of each individual page that was on the live website. These changes would then be implemented as per request with a preview generated for approval by the line manager and the client.

Once both parties were happy with the change, the editor would forward the implemented files to the client who would then upload them to the host server to go live on the company website.

September 2013- December 2014

Capita

Senior Technical Advisor

At Capita I began work providing technical assistance for the Tesco Broadband and Home Phone contract. The services would be managed by two teams know as 1st line who dealt with customer

directly over the phone and 2nd line who would chase up specific faults that were ready to be worked. During my time at Capita I got the opportunity to work for both of these teams and gained much experience with the inner workings of the networks processes.

My tasks included the following:

- Answering customer enquires
- Case managing customer accounts
- Mentoring junior agents
- Managing fault reports
- Assisting with customer escalations

Education & Qualifications

- Manchester Metropolitan University(2009-2012) - BSC Honours Applied Computing: 2:1
- Stockport College(2006-2009) - B-Tec National Diploma for Information Technology: Merit
- Cheadle and Marple College(2005-2006) - 4 x A Levels Grades B-D
- Kingsway High School(2000-2005) - 7 GCSEs at Grade C
